What do all these terms mean?

Don't know what a lot of these terms mean? You're not alone! I've assembled the following definitions to help you understand what they mean. This is by no means an exhaustive list.

Artistic Nude:

Photography of a nude model that is tasteful in the nature, but is still revealing. This type of image is more suited for gallery display rather than 'adult' magazines. These images are **not** pornographic in any way as they are not intended to arouse.

Boudoir:

Similar to Glamour in that the focus is kept on the model but is generally more revealing. Revealing outfits, lingerie, implied, partial and full nudity are all common for this style. Other common names for this style of image is "Just For Him" or "His eyes only" as it is common for women to give this kind of image to her partner.

Commercial Nude:

Similar to implied nudity but is intended for commercial, rather than glamour market. Think Abercrombie & Fitch or Calvin Klein print ads.

Concealed Nude:

Photography in which the model is fully or partially nude to the photographer without showing that nudity to the camera. An example of this is the common 'hands/arms over nipples' pose.

Figure:

Also known as 'Figure Study'. See 'Artistic Nude'

Glamour:

Photography that focuses on the model instead of fashion or product endorsement. State of dress varies from fully dressed to full nude.

Headshots:

Photographic technique where the focus of the photograph is a person's face. Professional actors and models are often required to include a head shot in their portfolio.

Implied Nude:

Photography in which the model appears to be, but may not actually be, fully or partially nude. Neither nipples nor genitals are shown in the photographs. Think 'suggestive' not 'revealing'.

Lingerie:

Photography where the model is wearing some form of under-garments. The style and amount of undergarments worn vary. This is typically done for glamour, boudoir or fashion and is usually non-nude.

Partial Nudity:

Partial Nudity can be broken down into several categories. Here are two common examples:
No Frontal Nudity: Model is at least partially nude but nipples and genitals are not exposed.
Topless: Models has exposed breasts but genitals are not revealed.

Parts:

Photography of specific body parts rather than the entire body. Any part of the body can be the subject but the face is not *usually* included.

Pin-up:

Glamour photography with a 'retro' feel like you'd see in an old-time mens' magazine or calendar. These images range from fully dressed to nude, but most often fall somewhere in between.
